1. Nature and Continuance of Operations

Freegold Ventures Limited (the "Company") is in the process of acquiring, exploring and evaluating precious and base metal properties. The Company will attempt to bring the properties to production, structure joint ventures with others, option or lease properties to third parties or sell the properties outright. The Company has not determined whether these properties contain ore reserves and the Company is considered to be in the exploration stage. The recoverability of the amounts expended by the Company on acquiring and exploring mineral properties is dependent upon future profitable production or selling the property.

The head office, principal address and registered records office of the Company is Suite 888 – 700 West Georgia Street, Vancouver, British Columbia, Canada, V7Y 1G5.

The Company's condensed consolidated interim financial statements as at March 31, 2023 and for the three-month period then ended have been prepared on a going concern basis, which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of business. The Company had a comprehensive loss of $330,427 for the three-month period ended March 31, 2023 and had working capital of $10,674,298 at March 31, 2023.

Management cannot provide assurance that the Company will ultimately achieve profitable operations or become cash flow positive, or raise additional debt and/or equity capital. If the Company is unable to raise additional capital in the immediate future, management expects that the Company will need to curtail operations, liquidate assets, seek additional capital on less favourable terms and/or pursue other remedial measures or cease operations. With the additional financing received during the three-month period ended March 31, 2023, management estimates it has sufficient working capital to continue operations for the next 12 months. These condensed consolidated Interim financial statements do not include any adjustments related to the recoverability and classification of assets or the amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

In March 2020, the World Health Organization declared coronavirus (COVID-19) a global pandemic. The COVID-19 pandemic of three years has resulted in supply chain disruptions, record high inflation and rising interest rates which all have impeded adversely the global economy and tightened the financial markets. It is indeterminable when inflation will be back to a normal level and the economy will recover. In May 2023, the World Health Organization declared the coronavirus (COVID-19) was no longer a global pandemic.

2. Significant Accounting Policies

The financial statements of the Company and its subsidiaries (the "Group") have been prepared in accordance with International Accounting Standards ("IAS") 34, "*Interim Financial Reporting*" using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

These financial statements have been prepared on the basis of accounting policies and methods of computation consistent with those applied in the Company's annual consolidated financial statements for the year ended December 31, 2022.

a) **Consolidation**

These condensed consolidated Interim financial statements include the accounts of the Company's wholly-owned subsidiaries, Free Gold Recovery, USA, Freegold Ventures Limited, USA, Grizzly Bear Gold Inc., McGrath Gold Inc. and Dolphin Gold Inc. (inactive), all incorporated in the United States. All subsidiaries are US corporations which are involved in exploration and evaluation of properties. Inter-company transactions and balances are eliminated upon consolidation.

b) **Significant Accounting Judgments, Estimates and Assumptions**

The preparation of the Company's consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the consolidated financial statements and reported amounts of income and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

The most significant accounts that require estimates and judgements as the basis for determining the stated amounts include the recoverability of exploration and evaluation properties, determination of functional currency, valuation of share-based compensation and recognition of deferred tax amounts.

Critical judgments exercised in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements are as follows:

Economic recoverability and probability of future economic benefits of exploration and evaluation properties
Management assesses whether there are any impairment indicators at each reporting period and if any are determined, will perform a valuation test. Management has determined that there were no impairment indicators and exploration, evaluation, and related costs incurred which were capitalized may have future economic benefits and may be economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefits including, geologic and other technical information, a history of conversion of mineral deposits with similar characteristics to its own properties to proven and probable mineral reserves, the quality and capacity of existing infrastructure facilities, evaluation of permitting and environmental issues and local support for the project.

Determination of functional currency
The Company determines the functional currency through an analysis of several indicators such as expenses and cash flow, financing activities, retention of operating cash flows, and frequency of transactions within the reporting entity.

Going concern of operations
The financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The assessment of the Company's ability to source future operations and continue as a going concern involves judgement. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. If the

going concern assumption is not appropriate for the financial statements, then adjustments would be necessary in the carrying value of assets and liabilities, the reported revenue and expenses and the statement of financial position classifications used (Note 1).

Information about assumptions and estimation uncertainties that have a significant risk of resulting in significant adjustments are as follows:

Valuation of share-based compensation

The Company uses the Black-Scholes option pricing model for valuation of share-based compensation. Option pricing models require the input of subjective assumptions including expected price volatility, risk-free interest rate, and forfeiture rate. Changes in the input assumptions can materially affect the fair value estimate and the Company's earnings and equity reserves.

Asset retirement obligations

The Company's asset retirement obligations represent management's best estimate of the present value of the future cash outflows required to settle estimated reclamation and closure costs on the Company's exploration projects. The provision reflects estimates of future costs, inflation and assumptions of risks associated with the future cash outflows, and the applicable interest rates for discounting the future cash outflows. Changes in the above factors can result in a change to the provision recognized by the Company.

Changes to the asset retirement obligations are recorded with a corresponding change to the carrying amounts of related exploration and evaluation assets. Adjustments to the carrying amounts of related mining properties can result in a change to future depletion expense.

Business combination versus asset acquisition

Determination of whether a set of assets acquired and liabilities assumed constitute a business may required the Company to make certain judgments, taking into account all facts and circumstances. A business is presumed to be an integrated set of activities and assets capable of being conducted and managed for the purpose of providing a return in the form of dividends, lower costs or economic benefits. The transaction with Alaska Mining & Development Co., Inc. was determined to constitute an acquisition of assets (Note 4 vii).

c) **Cash and Cash Equivalents**

The Company considers cash and cash equivalents to include amounts held in banks and highly liquid investments with maturities at point of purchase of 90 days or less. The Company places its cash and cash equivalents with institutions of high-credit worthiness.

As at March 31, 2023, the Company holds cash of $11,311,634 (December 31, 2022 - $653,388) and cash equivalents of $39,879 (December 31, 2022 - $39,847).

d) **Financial Instruments**

Financial instruments consist of financial assets and financial liabilities, and are initially recognized at fair value net of transaction costs that are directly attributable to the acquisition or issue of the financial asset or liability. Transaction costs of financial assets and financial liabilities carried at fair value through profit or loss are expensed in profit and loss.

The Company classifies its financial assets and financial liabilities in the following measurement categories:

a) those to be measured subsequently at fair value (either through other comprehensive income or through profit or loss); and
b) those to be measured at amortized cost.

The classification of financial assets depends on the business model for managing the financial assets and the contractual terms of the cash flows. Financial assets that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding, are generally measured at amortized cost at the end of subsequent accounting periods. All other financial assets are measured at their fair values at the end of subsequent accounting periods, with any changes taken through profit and loss or other comprehensive income. The Company's cash and cash equivalents, restricted cash, amounts receivable and deposits are recorded at amortized cost.

Financial liabilities are classified as those to be measured at amortized cost unless they are designated as those to be measured subsequently at fair value through profit or loss (irrevocable election at the time of recognition). Any fair value changes due to credit risk for liabilities designated at fair value through profit and loss are recorded in other comprehensive income.

The Company reclassifies financial assets when and only when its business model for managing those assets changes. Financial liabilities are not reclassified.

Impairment of Financial Assets

An expected credit loss (ECL) model applies to financial assets measured at amortized cost, contract assets and debt investments at fair value through other comprehensive income, but not to investments in equity instruments. The Company's financial assets, measured at amortized cost and subject to the ECL model, include cash and cash equivalents, and amounts receivable.

An entity is required to recognize expected credit losses when financial instruments are initially recognized and to update the amount of expected credit losses recognized at each reporting date to reflect changes in the credit risk of the financial instruments. In addition, IFRS 9 requires additional disclosure requirements about expected credit losses and credit risk.

Impairment losses on financial assets carried at amortized cost are reversed in subsequent periods, if the amount of the loss decreases and the decrease can be objectively related to an event occurring after the impairment was recognized.

Financial liabilities

All financial liabilities are initially recorded at fair value and designated upon inception as fair value through profit or loss ("FVTPL") or amortized cost. Financial liabilities classified as amortized cost are initially recognized at fair value less directly attributable transaction costs.

The Company's trade payables, accrued liabilities, lease liability and project cost advance received are classified at amortized cost. The Company does not currently have any FVTPL financial liabilities.

e) **Exploration and Evaluation Properties**

Exploration and evaluation expenditures include the costs of acquiring licenses, costs associated with exploration and evaluation activity, and the fair value (at acquisition date) of exploration and evaluation assets acquired in a business combination. Exploration and evaluation expenditures are capitalized. Costs incurred before the Company has obtained the legal rights to explore an area are recognized in profit or loss.

Option payments received are treated as a reduction of the carrying value of the related exploration and evaluation properties and deferred costs until the receipts are in excess of costs incurred, at which time they are credited to income. Option payments are at the discretion of the optionee, and accordingly, are recorded on a cash basis.

Once the technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, exploration and evaluation assets attributable to that area of interest are first tested for impairment and then reclassified to mining property and development assets within property, plant and equipment.

Recoverability of the carrying amount of any exploration and evaluation assets is dependent on successful development and commercial exploitation, or alternatively, sale of the respective areas of interest.

3. Approval

These condensed consolidated Interim financial statements were approved and authorized for issue by the Audit Committee of the Board of Directors on May 11, 2023.

a) **Golden Summit Property, Alaska, USA**

In 1997, the Company acquired certain mineral claims from Fairbanks Exploration Inc. ("FEI"), subject to a 7% carried working interest held in trust by the Company for FEI. After production is achieved, FEI must contribute 7% of any future approved budget. The same claims are also subject to a 2% NSR payable to FEI. The Company has a 30-day right of first refusal in the event that the 7% carried working interest of FEI or the NSR is to be sold. The Company can also purchase the NSR at any time following the commencement of commercial production, for a price equal to its then net present value as determined in accordance with an agreed upon formula.

(i) **Keystone Claims**

By an agreement dated May 17, 1992, the Company entered into a lease agreement, subsequently amended, with Keystone Mines Partnership whereby the Company agreed to make advance royalty payments. The Company has paid $2,330,000 to March 31, 2023 (December 31, 2022 - $2,330,000) and under the current agreement will pay $75,000 per annum for as long as the advance royalty payment is being paid or mining, permitting or processing is being conducted on the Property. The property is subject to a 3% NSR.

(ii) **Newsboy Claims**

By lease agreement dated February 28, 1986, subsequently amended, the Company assumed the obligation to make advance royalty payments. The Company has paid $273,000 to March 31, 2023 (December 31, 2022 - $261,000).

On February 22, 2022, the Company received a lease extension for an additional 5 years from March 1, 2022 to February 28, 2027. The minimum royalty payable under the amended lease will be $12,000 per year for the term of the lease. The lease payment for 2023 of $12,000 was paid.

The claims are subject to a 4% NSR. The Company has the option to purchase the NSR for the greater of the current value or US$1,000,000 less all advance royalty payments completed to date.

(iii) **Tolovana Claims**

In May 2004, the Company entered into an agreement with a third party (the "Seller") whereby the Seller transferred 100% of the rights via a Quit Claim Deed to a 20-year lease on the Tolovana Gold Property in Alaska.

Under the terms of the agreement, the Company assumed all of the Seller's obligations under the lease, which include making annual lease payments. The Company has paid $326,750 to March 31, 2023 (December 31, 2022 - $322,250) and under the current agreement will pay $18,000 per annum until 2024. The Company has the option to renew the lease for an additional 10-year term.

The property is subject to a sliding scale NSR as follows: 1.5% NSR if gold is below $300 per ounce, 2.0% NSR in the event the price of gold is between $300 to $400, and 3.0% NSR in the event that the price of gold is above $400.

The Company, at its option, can purchase 100% of the Tolovana Gold Property claims and NSR for $1,000,000 less any amounts paid.

(iv) **Green Claims**

On December 16, 2010, the Company entered into a 20-year lease agreement with Christina Mining Company, LLC to lease certain mineral claims in the Fairbanks Mining District of Alaska known as the Green Property. The Company has paid $1,350,000 to March 31, 2023 (December 31, 2022 - $1,250,000) and under the current agreement will pay $200,000 per annum until 2028 and $250,000 in 2029. Pursuant to the agreement, the Company was required to incur $1,000,000 in cumulative exploration expenditures (incurred).

The claims are subject to a 3% NSR.

The Company paid $100,000 in 2022 towards the 2022 advance royalty payment and the remaining $100,000 was paid during the three-month period ended March 31, 2023.

(vii) **Alaska Mining and Development Property**

By agreement effective September 9, 2020, the Company completed the acquisition of Alaska Mining & Development Co., Inc. (“Alaska Mining”, subsequently dissolved), for $1,100,000. Alaska Mining owned certain mineral claims in the Fairbanks Mining District of Alaska.

(viii) **Discovery Claims**

By agreement effective June 23, 2021, the Company purchased certain mineral claims in the Fairbanks Mining District of Alaska for cash consideration of $500,000.

b) **Shorty Creek Property, Alaska, USA**

By agreement dated July 17, 2014, the Company entered into a renewable 10-year lease agreement to lease certain mineral claims located northwest of Fairbanks, Alaska known as the Shorty Creek Property. On August 8, 2014, the Company issued 750,000 common shares as consideration for entering into the lease agreement. The vendor will retain a 2% NSR. The Company is responsible for ongoing annual assessment work as required by the State of Alaska. In 2014 and 2016, additional claims were staked within and outside the area of interest and the Company will be responsible for these annual State of Alaska rents.

On March 5, 2019, the Company entered into an agreement (the "SC Option Agreement") subsequently amended with a wholly-owned subsidiary of South32 Limited ("South32") whereby South32 had the option to earn a 70% interest in the Shorty Creek Property. To maintain the option in good standing under the SC Option Agreement, South32 was required to contribute minimum exploration funding of $10 million over a 4-year option period.

Expenditure funding of $149,756 (December 31, 2021 - $2,493,570) were received prior to the termination of the agreement during the year ended December 31, 2022.

During the three-month period ended March 31, 2023, no management fee revenue (March 31, 2022 - $6,189) was earned pursuant to the 10% operator fee. During the year ended December 31, 2022, South32 provided notice of its intention and election not to further fund any further Tranche Payments as defined in, and in terms of, the Option Agreement, and accordingly the Option Agreement has been terminated.

c) **Stock Options**

The Company has established a stock option plan (the "Stock Option Plan") whereby the Board of Directors (the "Board"), may from time to time, grant options to directors, officers, employees or consultants. At the Company's Annual General Meeting held on June 29, 2021, shareholders re-approved a resolution which reserves up to 10% of the issued and outstanding shares from time to time (including existing stock options), as a "rolling stock option plan". Stock options may be granted under the Stock Option Plan with an exercise period of up to ten (10) years from the date of grant or such lesser period as determined by the Board, subject to a short extension in the case of a Company imposed blackout period. Any stock options granted under the Stock Option Plan will not be subject to any vesting schedule, unless otherwise determined by the Board. The exercise price of an option will not be less than the closing price of the common shares on the day prior to grant. The policies of the TSX require the approval of all unallocated options, rights or entitlements under the Stock Option Plan by the Company's shareholders every three years with the next such renewal approval requested by shareholders on or before June 29, 2024.

A summary of the Company's stock options at March 31, 2023 and the changes for the period are as follows:

10. Financial Instruments and Risk Management

a) **Financial Instruments**

The carrying value of financial assets and liabilities at March 31, 2023 and December 31, 2022 are as follows:

		March 31, 2023		December 31, 2022
Financial Assets				
Amortized cost				
Cash and cash equivalents	**$**	**11,351,513**	$	693,235

Accrued liabilities		**25,148**		64,152
Due to related parties		**76,071**		-
Lease liability		**120,969**		128,106

The carrying value of these financial instruments approximates their fair values.

Financial instrument hierarchy

Financial instruments measured at fair value on the condensed consolidated Interim statement of financial position are summarized into the following fair value hierarchy levels:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company does not carry any financial instruments measured at fair value through profit or loss.

b) **Capital Management**

The capital structure of the Company consists of equity attributable to common shareholders, comprising issued capital, accumulated other comprehensive income (loss) and deficit. The Company's objectives when managing capital are to: (i) preserve capital, (ii) obtain the best available net return, and (iii) maintain liquidity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue new debt, acquire or dispose of assets or adjust the amount of cash and cash equivalents and investments.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. There were no changes in the Company's approach to capital management during the period ended March 31, 2023. Neither the Company nor its subsidiaries are subject to externally imposed capital requirements.

c) **Credit Risk**

Credit risk is the risk of an unexpected loss if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises primarily from the Company's cash and cash equivalents and amounts receivable. The Company manages its credit risk relating to cash and cash equivalents by dealing only with highly-rated Canadian financial institutions. As at March 31, 2023, amounts receivable of $24,760 was comprised of goods and services tax receivable. As a result, credit risk is considered insignificant.

d) **Liquidity Risk**

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk by continuously monitoring actual and projected cash flows and matching the maturity profile of financial assets and liabilities. As at March 31, 2023, the Company had cash of $11,351,513 to settle current liabilities of $806,927 and accordingly the Company has limited exposure to liquidity risk.

e) **Currency Risk**

Foreign currency exchange risk is the risk that future cash flows, net income (loss) and comprehensive income (loss) will fluctuate as a result of changes in foreign exchange rates. As the Company's operations are conducted internationally, operations and capital activity may be transacted in currencies other than the functional currency of the entity party to the transaction.

The Company's objective in managing its foreign currency risk is to minimize its net exposures to foreign currency cash flows by obtaining most of its estimated annual U.S. cash requirements and holding the remaining currency in Canadian dollars. The Company monitors and forecasts the values of net foreign currency cash flow and condensed consolidated Interim statement of financial position exposures and from time to time could authorize the use of derivative financial instruments such as forward foreign exchange contracts to economically hedge a portion of foreign currency fluctuations.

The following table provides an indication of the Company's foreign currency exposures during the periods ended March 31, 2023 and December 31, 2022:

	March 31, 2023 (Cdn$)	December 31, 2022 (Cdn$)
Cash and cash equivalents	**14,622,309**	122,308
Trade payables and accruals	**237,703**	82,835

A 1% change in Canadian/US foreign exchange rate at period end would have changed the net loss of the Company, assuming that all other variables remained constant, by approximately $144,000 for the period ended March 31, 2023 (March 31, 2022 - $105,000)

The Company has not entered into any derivative instruments to offset the impact of foreign currency fluctuations.

f) **Interest Rate Risk**

The Company is not subject to interest rate risk.

g) **Commodity Price Risk**

The Company is in the exploration stage and is not subject to commodity price risk.
